

# TECHNICAL REGULATION ANNOUNCEMENT

**Title** EAC/GOST DoC registration procedure changes

**Date** October 28, 2020

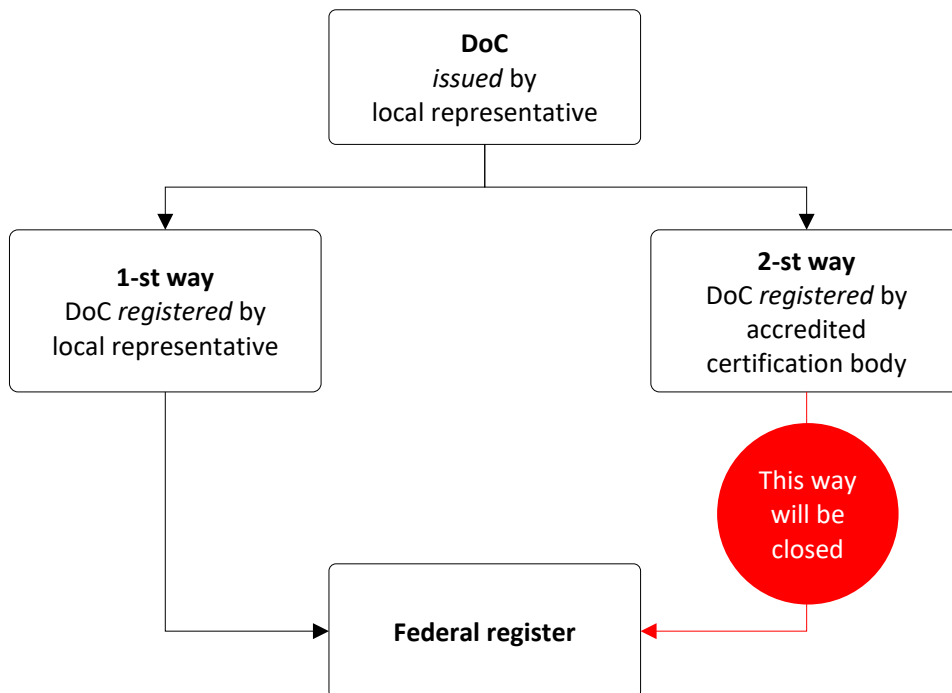

**Technical Regulation scope** CU/EAEU TR, EAC/GOST marking

Dear colleagues!

We would like to inform you about EAC/GOST DoC registration procedure changes. According to the current CU TR/EAEU/GOST DoC registration procedure, there are two ways to register declarations:

1. DoC can be registered by a certification body;
2. DoC can be registered directly by a local representative of a manufacturer.

Until recently, these ways were absolutely equal. At the same time, according to Russian legislation (Federal law "On Technical Regulation"), the certification body does not have the authority to register declarations of conformity. Currently, the powers of certification bodies are being re-evaluated. At the end of this period (approximately at the end of December 2020) **certification bodies will not be able to register declarations**. Therefore, we recommend you to register declarations together with our authorized company (RC, Delta etc. companies) directly in the Federal register.
