Notice

¹⁾ If RU and CU declaration applicable at the same time, in this case, it's enough to get one of them to import, clear customs and sale the battery on Russian territory

²⁾ No FAC (= Telecom) mark at all

Telecommunication equipment declared by FAC

Russian Federal Agency of Communication (FAC) statistic

1. It's important to remember that battery and power supply is object of the obligatory telecom regulation if it's used in telecommunication scope and should be approved by FAC (Federal Agency of Communication)

2. Please note that the Declaration of Conformity for batteries and power supplies take the second place among all telecom declarations registered by Federal Agency of Communications in Russia
